COMPREHENSIVE STROKE CENTER

As a Comprehensive Stroke Center, we treat more than 1,700 ischemic and hemorrhagic stroke patients per year, including almost 300 treated with IV thrombolysis, more than 120 treated with thrombectomy, and 200 with brain aneurysms.

An expanding, innovative neurointensive care unit, staffed by board-certified neurointensivists, helps our team care for very complex and critically-ill cerebrovascular disease patients.
